# CHINASOFT INTERNATIONAL AND HUICHUAN TECHNOLOGY REACHED COMPREHENSIVE STRATEGIC COOPERATION THE WORLD'S FIRST OPENHARMONY INDUSTRIAL INTELLIGENT OPERATING SYSTEM OFFICIALLY LAUNCHED

Chinasoft International Limited (hereinafter referred to as ("Chinasoft International" or the "Company") publishes this announcement as a voluntary announcement to let the public know the latest information of the Company.

Recently, Chinasoft International and Huichuan Technology reached a comprehensive strategic cooperation, and announced the official launch of the world's first OpenHarmony industrial intelligent operating system, the two parties will jointly promote the process of industrial intelligence based on domestic autonomous and controllable bases, and empower thousands of industries to upgrade their intelligence with more efficient and intelligent industrial manufacturing technology.

OpenHarmony is an Open-Source project incubated and operated by the Open Atom Open-Source Foundation. It is an intelligent IoT operating system for the all-scenario, all-connected, and all-intelligent era. As the foundation's platinum donor and the initial member of the OpenHarmony project working committee, Chinasoft International uses OpenHarmony as its technology base, combined with its capabilities in AIoT, intelligence, and big data, to launch the OpenHarmony operating system release version for the consumer and industry sectors. In the industrial field, Chinasoft International will join the OHI (OpenHarmony Industry) field working group, and strengthen close cooperation with OHI, and start the joint development of OpenHarmony release version in the industrial field with Huichuan Technology in the spirit of open source, co-construction, co-governance and sharing, from open source to open source, build a domestically-made and controllable system base for digital China.

As a leading global software and information technology services company, Chinasoft International and Huichuan Technology, a leader in industrial automation control and drive technology, have joined forces to promote the development of OpenHarmony's industrial intelligent mobile open ecology business. Chinasoft International will play a role in OpenHarmony capability building, service, operation and marketing, and launch joint innovation in industrial automation, industrial robotics, intelligent elevators, new energy vehicles, rail transportation and other fields. Also based on OpenHarmony capabilities, Chinasoft International will deeply customize the Industrial Intelligence OS distribution.

The cooperation between Chinasoft International and Huichuan Technology opens a new chapter of domestic autonomous and controllable industrial intelligent operating system, and opens the prelude for OpenHarmony to empower thousands of industries. With years of technology accumulation in the software and AIoT industry, Chinasoft International will continue to contribute to the commercialization of OpenHarmony and the acceleration of ecological construction. In the consumer sector, the Company will continue to provide enabling access, enabling intelligence, enabling full-scene full-stack products and services for a wide range of smart hardware manufacturers to build the AIoT ecology; In the industry sector, the Company will take empowerment of industrial intelligence as the starting point and continue to empower finance, transportation, electric power, party and government industries by taking advantage of its industry reach to build an industrial intelligence ecology based on domestic independent security and controllability.
